

PARALLEL SESSION 3.5

MAKING GLOBAL TRADE POLICIES WORK FOR UHC

| BACKGROUND

Global trends in trade policies is currently a hot political issue across the world and becoming an ever more important 'megatrend' of relevance to the achievement of Universal Health Coverage. The changing landscape of global, regional, and bilateral trade agreements and practices has important implications for achieving SDG3 in enabling, or limiting, governments' strategies to pursue policy coherence, financing and good governance of the health services, and ensuring access to affordable medicines.

Current global politics of looming trade wars and sanctions against some countries can have a profound impact on the supply of life saving health commodities. This is a sensitive topic indeed. But it must be openly and candidly discussed as a challenge to the achievement of UHC in countries around the world.

This session will provide an overview of key trade policy issues and experiences that are relevant for all countries in their efforts to achieve or maintain UHC. It will focus on case studies on risks and opportunities for health promotion - including regulating health-harming industries and practices - and trade in health commodities of direct relevance to UHC. It will then focus on strategies for promoting innovation and access to affordable and quality medicines and other health products and technologies for all countries and people, in the spirit of the 2030 Agenda of Leaving No One Behind.

| OBJECTIVES

The objective of this session is to spotlight the opportunities and challenges of recent trends in trade policies and practices on countries' efforts to achieve or maintain UHC; to increase visibility about the risk and benefits involved, share lessons learnt, and to discuss concrete actions that must be taken in the interest of the lives of people.

Panelist

Rachel Silverman

Policy Fellow

Center for Global Development
United States of America

Rachel Silverman is a Policy Fellow at the Center for Global Development, where she leads policy-oriented research on global health financing and incentive structures. Silverman's current research focuses on efficient global health procurement; innovation models for global health; priority-setting for UHC; alignment and impact in international funding for family planning; strategies to strengthen evidence; the practical application of results-based financing; global health transitions; and accountability. Her research and commentary is widely published in academic journals, including *The Lancet* and *Health Affairs*; CGD reports; and book chapters, including contributions to *Millions Saved: New Cases of Proven Success in Global Health* and *What's In, What's Out: Designing Benefits for Universal Health Coverage*. She holds a master's of philosophy with distinction in public health from the University of Cambridge, which she attended as a Gates Cambridge Scholar. She also holds a BA with distinction in international relations and economics from Stanford University.
