

PARALLEL SESSION 1.2

INVESTING IN THE HEALTH WORKFORCE FOR THE 21ST CENTURY

| BACKGROUND

The Astana Declaration recognized the importance of health workforce education, employment, motivation and retention and pledged to strengthen the primary health care workforce to effectively respond to community and population needs. Estimates show a projected shortfall of 18 million health workers by 2030 to achieve and sustain universal health coverage (UHC), primarily in low- and lower middle-income countries. The Global Strategy on Human Resources for Health and the report of the United Nations' High-Level Commission on Health Employment and Economic Growth have each elaborated a health workforce transformation and investment agenda for UHC and the SDGs. In 2017, the ILO-OECD-WHO Working for Health Programme was established to advance the operationalization of the Commission's recommendations, particularly at country level. This session will present and discuss country experiences, highlighting priority actions taken to close the anticipated 18 million health worker gap and expand and transform the health and social workforce for universal health coverage and the SDGs.

| OBJECTIVES

To highlight key actions and results from a range of countries that have taken concrete steps to drive investment in their health and social care workforce in line with the recommendations of the high-level commission, including those supported through the ILO-OECD-WHO Working for Health Programme. The session will explore how multisectoral engagement in economic development, job creation and community-based services can successfully leverage investments, resources and policy support to build a fit for purpose and sustainable health and social workforce for UHC and the SDGs.

Dr Ayat Abu-Agla is a Public Health consultant, with a MBBS, MPH, Medical Doctorate in Community Medicine and a MFPH-RCP UK. She has over a decade of diverse work experience in LMICs (mainly Sudan) through positions in healthcare, academia and professional associations. Her research is in the areas of Reproductive health, health systems and human resources for health (HRH) in post conflict and LMICS. Among the projects she led was the first mapping of health and medical educational pipeline survey in Sudan, the health labour market study with WHO-HQ/EMRO/AFRO, HRH migration, Sudan-Ireland Partnership Program (in health, training and HRH and development of a nationally endorsed performance tool for PHC community midwives in Sudan). She is currently based at the Centre for Global Health at Trinity College Dublin (TCD). She lectures on Reproductive Health and HRH as the global health lead in the Masters of Development Practice at TCD. She also serves as TDR/WHO Implementation Research temporary adviser since 2013. As well an HWF expert in WHO-HQ in W4H programme.
